

WORLD ENVIRONMENT DAY CELEBRATION AT FIDES

On June 5th 2026 World Environment Day was celebrated with great enthusiasm at FIDES June the programme brought together all the students to reflect on the importance of protecting and caring for our environment.

The celebration began with a plantation activity where students planted saplings around the campus. They actively participated in the activity and learned how even small efforts can contribute to a greener and healthier planet. The plantation drive created a sense of responsibility among the students towards nature and environmental conservation.

To make the day more engaging and creative, a Poster Making Competition was organized. Students expressed their ideas and concerns about environmental protection through colorful and meaningful posters. Their creativity and awareness were clearly reflected in their work, making the competition both inspiring and educational.

The event concluded on a joyful note with the distribution of chocolates to all the students. The simple gesture added to the festive spirit of the day and brought smiles to everyone's faces.

The celebration was a wonderful opportunity for the students to learn, participate, and contribute towards environmental awareness. It was a meaningful day that encouraged everyone to adopt eco-friendly habits and play their part in creating a sustainable future.
